

CNC Plastics Machining

Do you have a part that requires a combination of lathe work and fourth-axis mill work? Contact CTG—we will meet your machining needs. Complex geometries and tight tolerances are the kind of challenges we deal with every day, and we can create products from a sample or from a drawing.

Do you need your part in a hurry? Our lean manufacturing facility allows us to provide rapid response, whether on custom batches or on production runs, so you do not need to keep a large inventory of critical parts. Our state-of-the-art machines integrate existing engineering design support to quickly transform your CAD data into your product.

Plastics in Stock

We keep a wide variety of plastics on hand, including the following:

- Acetal
- CPVC
- Delrin®
- Filled PTFE
- HDPE
- Kel-F®
- Kynar®
- Nylon
- Nylon MD
- PEEK
- Polycarbonate
- Polypropylene
- PTFE
- PVC
- Ryton®
- TFM™
- UHMW
- Vespel®

The list above is not all inclusive, and we have the capability of providing you with the material you need.

State-of-the-art machining centers produce parts to exacting specifications

Applications

- Complex geometries
- High precision components
- Custom batches or production runs

Benefits

- More than 30 years of experience working with engineering plastics
- Same-day service available
- Rapid transformation of models to product using CAD/CAM solutions
